

Java JComboBox Example

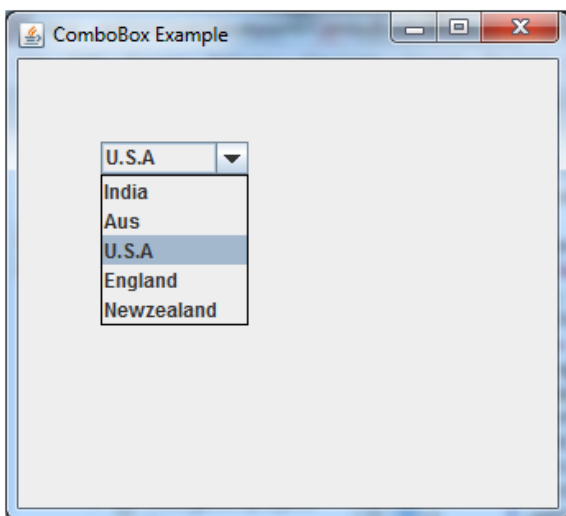

```
import javax.swing.*;

public class ComboBoxExample {
    JFrame f;

    ComboBoxExample(){
        f=new JFrame("ComboBox Example");
        String country[]={"India","Aus","U.S.A","England","Newzealand"};
        JComboBox cb=new JComboBox(country);
        cb.setBounds(50, 50,90,20);
        f.add(cb);
        f.setLayout(null);
        f.setSize(400,500);
        f.setVisible(true);
    }

    public static void main(String[] args) {
        new ComboBoxExample();
    }
}
```

Output:

Java JComboBox Example with ActionListener

```
import javax.swing.*;
import java.awt.event.*;

public class ComboBoxExample {
    JFrame f;

    ComboBoxExample(){
        f=new JFrame("ComboBox Example");

        l = new JLabel();
        l.setAlignment(JLabel.CENTER);
```
